# THE MANUFACTURING INDUSTRIES OF CANADA, BY PROVINCES, 1949

## LES INDUSTRIES MANUFACTURIÈRES DU CANADA, PAR PROVINCES, 1949

The manufacturing industries of Canada in 1949 again established a new record in gross value of production with a total of \$12,479,593,300. This includes the value of manufactured products reported by Newfoundland amounting to \$67,264,282. By excluding Newfoundland, the increase in gross value was 4.5 per cent over the previous year and 37 per cent over the maximum war production attained in 1944. The major part of this increase, however, was due to increased prices of partly and fully manufactured products, and only a minor part, to an actual increase in the volume. The number of employees at 1,164,273, exclusive of Newfoundland which reported 6,934, although representing an increase of .8 per cent over the previous year, was still 76,795 below the record number employed in 1943. Salary and wage payments at \$2,591,890,657 (\$2,576,404,321 exclusive of Newfoundland) were the highest on record and exceeded the previous high reported in 1948 by \$166,594,530.

Two major changes were adopted in the compilation of manufacturing statistics for 1949. First, the compilations contain for the first time statistics for Newfoundland, and second, there was also a change in the system of classifying industries. Under the Standard Classification adopted in 1949, the industries are grouped into seventeen major groups as listed in Table 4 instead of the following nine groups formerly used:

1. Vegetable products
2. Animal products
3. Textiles and textile products
4. Wood and paper products
5. Iron and its products
6. Non-ferrous metal products
7. Non-metallic mineral products
8. Chemicals and allied products
9. Miscellaneous industries

Some industries were broken down such as the electrical apparatus and supplies industry which now comprises five industries (a) batteries, (b) heavy electrical machinery, (c) radios and radio parts, (d) refrigerators, vacuum cleaners and appliances, and (e) miscellaneous electrical products. In some cases establishments were transferred from one industry to another in order to bring them in line with the new industries which were established. Where an industry was eliminated the establishments were transferred to one or several other industries, depending on the nature of the principal products manufactured. A check was also made of each establishment and many transfers were made where the major products of the establishment had materially changed during the past few years. All these changes make it practically impossible to evaluate industry changes between 1948 and 1949.

To allow of a comparison with 1948 the industries for that year were recompiled on the new basis. The percentage changes in employment, salaries and wages paid, and gross value of production are given in the Table below wherever the comparability of the groups remained more or less unchanged by the various changes mentioned in the preceding paragraph.

From the point of view of employment which more closely reflects changes in the physical volume of production than any other factor, the petroleum and coal products group with an increase of 6.4 per cent reported the greatest increase in production. The chemical products group came second with 4.5 per cent; followed by electrical apparatus and supplies with 3.8 per cent; textile products (except clothing) 3.2 per cent; non-metallic mineral products 3.2 per cent; clothing (textile and fur) 2.3 per cent; tobacco and tobacco products 2.2 per cent; transportation equip-

De nouveau, en 1949, la valeur brute de la production des industries manufacturières du Canada atteint un chiffre sans précédent, \$12,479,593,300. Ce chiffre comprend la valeur des produits fabriqués à Terre-Neuve, qui s'élève à \$67,264,282. Sans Terre-Neuve, la valeur brute augmente de 4.5 p. 100 au regard de l'année précédente et de 37 p. 100 au regard du maximum de guerre, atteint en 1944. Toutefois, la majeure partie de cette augmentation est attribuable à la hausse des produits partiellement et entièrement fabriqués et une faible partie à une augmentation réelle du volume. Si le nombre d'employés (1,164,273), à l'exception des 6,934 déclarés à Terre-Neuve, représente une augmentation de .8 p. 100 au regard de l'année précédente, il n'en demeure pas moins de 76,795 au-dessous du chiffre sans précédent atteint en 1943. Les salaires versés dans ces industries s'élèvent à \$2,591,890,657 (\$2,576,404,321 sans Terre-Neuve) et sont les plus élevés encore atteints; ils dépassent le maximum antérieur, atteint en 1948, par \$166,594,530.

Deux changements importants ont été apportés à la méthode de calcul de la statistique manufacturière en 1949. D'abord, et pour la première fois, les calculs tiennent compte des chiffres de Terre-Neuve et ensuite, la méthode de classification des industries a été modifiée. D'après la nouvelle classification adoptée en 1949, les industries sont réparties entre dix-sept groupes principaux, énumérés au tableau 4, plutôt qu'entre les neuf groupes autrefois employés et qui sont les suivants:

1. Substances végétales
2. Produits animaux
3. Textiles et tissus
4. Bois et papier
5. Fer et ses produits
6. Métaux non ferreux
7. Métalloïdes
8. Produits chimiques
9. Industries diverses

Certaines industries ont été subdivisées; par exemple, l'industrie des appareils et des fournitures électriques comprend maintenant cinq industries: a) accumulateurs, b) machinerie électrique lourde, c) radios et pièces, d) réfrigérateurs, aspirateurs et autres articles électriques, et e) articles électriques divers. Il a fallu, dans certains cas, transporter les établissements d'une industrie à une autre afin qu'ils soient en harmonie avec les industries nouvelles. Là où une industrie a été éliminée, les établissements ont été transportés à une ou plusieurs autres, selon la nature du principal produit fabriqué. Chaque établissement a aussi été vérifié et plusieurs transferts ont été effectués là où les principaux produits de l'établissement ont changé sensiblement au cours des quelques dernières années. En raison de tous ces changements, il est à peu près impossible d'évaluer les transformations qui se sont produites dans l'industrie entre 1948 et 1949.

Afin de permettre une comparaison avec 1948, les industries de cette année-là ont été réanalysées d'après la nouvelle base. Les changements proportionnels dans l'emploi, la rémunération et la valeur brute de la production sont données au tableau ci-dessous partout où la comparabilité des groupes est demeurée plus ou moins la même à la suite des divers changements mentionnés dans le paragraphe précédent.

Du point de vue de l'emploi, qui reflète plus fidèlement que tout autre facteur les changements qui se produisent dans le volume physique de la production, le groupe des dérivés du pétrole et du charbon, avec une augmentation de 6.4 p. 100, accuse l'augmentation de production la plus marquée. Le groupe des produits chimiques vient ensuite avec 4.5 p. 100. Suivent les appareils et fournitures électriques avec 3.8 p. 100; les produits textiles et tissus (moins les vêtements), 3.2 p. 100; les produits des minéraux non métalliques, 3.2 p. 100; les vêtements (textile et fourrure) 2.3 p. 100; le tabac et produits, 2.2 p. 100; l'équipement

ment 2.1 per cent; leather products 1.8 per cent; and food and beverages 0.1 per cent. Several groups reported reduced activity. The greatest decline was reported by the rubber products group with a drop of 4.5 per cent in the number of employees; followed by iron and steel products with 3.8 per cent; paper products 3.4 per cent; wood products 3.3 per cent; and non-ferrous metal products 1.9 per cent. No comparisons can be made for printing, publishing and allied trades or the miscellaneous industries group.

de transport, 2.1 p. 100; les articles en cuir, 1.8 p. 100; et les aliments et boissons, 0.1 p. 100. Divers groupes signalent une activité réduite. La diminution la plus marquée est celle du groupe des articles en caoutchouc où les employés diminuent de 4.5 p. 100; viennent ensuite les groupes des produits du fer et de l'acier, avec une diminution de 3.8 p. 100; les produits du papier, avec 3.4 p. 100; les produits du bois, avec 3.3 p. 100; et les produits des métaux non ferreux, avec 1.9 p. 100. Aucune comparaison ne peut encore être établie à l'égard de l'impression, de l'édition et des métiers connexes ou du groupe des industries diverses.

1. Exclusive of Newfoundland. — Terre-Neuve non compris.

2. Due to the change of establishments from one industry to another the figures for 1948 and 1949 are not comparable. — En raison du transfert des établissements d'une industrie à une autre les chiffres de 1948 et 1949 ne peuvent être comparés.

Manufacturing establishments reporting in 1949 numbered 35,792. Of these 793 were located in Newfoundland, 251 in Prince Edward Island, 1,480 in Nova Scotia, 1,060 in New Brunswick, 11,579 in Quebec, 12,951 in Ontario, 1,520 in Manitoba, 962 in Saskatchewan, 1,685 in Alberta, 3,493 in British Columbia and 18 in Yukon and Northwest Territories. These plants furnished employment to 1,171,207 persons who received \$2,591,890,657 in salaries and wages. They also produced goods with a selling value at the factory of \$12,479,593,300 and spent \$6,843,231,064 for materials, while the value added by manufacture totalled \$5,330,566,434. It should be remembered that the value added by manufacture does not represent the manufacturers' profits. The value added is obtained by subtracting the cost of materials, including fuel and electricity, from the value of the products. This difference represents the value added to the raw materials by labour. It is this difference which the employer of labour uses to pay for the labour itself, the overhead expenses, interest and profits. Compared with the previous year, there was an increase of \$648,313,388 in the value added by manufacture.

Le nombre d'établissements manufacturiers qui font rapport en 1949 est de 35,792 dont 793 à Terre-Neuve, 251 dans l'Île du Prince-Edouard, 1,480 en Nouvelle-Ecosse, 1,060 au Nouveau-Brunswick, 11,579 dans Québec, 12,951 en Ontario, 1,520 au Manitoba, 962 en Saskatchewan, 1,685 en Alberta, 3,493 en Colombie-Britannique et 18 au Yukon et dans les Territoires du Nord-Ouest. Ces établissements procurent du travail à 1,171,207 personnes qui touchent une rémunération totale de \$2,591,890,657. La valeur marchande de leurs produits s'élève à \$12,479,593,300 et la valeur des matières employées à \$6,843,231,064, tandis que la valeur ajoutée par la fabrication est de \$5,330,566,434. Il faut se rappeler que la valeur ajoutée par la fabrication ne représente pas les profits des manufacturiers. On l'obtient en soustrayant de la valeur des produits le coût des matières premières, le combustible et l'électricité. La différence représente la valeur ajoutée aux matières premières par le travail et sert à payer la main-d'œuvre, les frais généraux, les intérêts et les bénéfices. Au regard de l'année précédente, la valeur ajoutée par la fabrication augmente de \$648,313,388.

The manufacturing industries of Canada are concentrated largely in the provinces of Ontario and Quebec. Ontario is the dominant manufacturing province of Canada. In 1949, with only 36 per cent of the total number of establishments reporting, it furnished employment to 48 per cent of the number of persons engaged in manufacturing and produced 49 per cent of the entire output. Quebec with 30 per cent of the output ranks second, while British Columbia with 8 per cent ranks third.

As mentioned previously, the number of persons employed in manufacturing in 1949, including Newfoundland, totalled 1,171,207 of whom 221,551 were classed as salaried employees and working proprietors and 949,656 as wage-earners. Compared with the previous year there was an increase of 15,201 employees. Male employees increased by 9,935 and female employees by 5,266. To meet the shortage of man power during the war years, more and more women were absorbed into industry. Indicative of this trend is the increase in the proportion of women workers engaged in manufacturing. Whereas in 1939, out of every 1,000 employed 220 were females; in 1944 this figure jumped to 287. With the end of the war many female workers who lost their jobs were not absorbed by other industries, with the result that the proportion of females employed in manufacturing declined to 240 in 1949. Earnings in 1949 were \$2,213 as against \$2,085 the previous year. Average salaries at \$2,836 were \$149 higher, while average wages at \$2,068 were \$109 higher.

In interpreting the industry statistics published in this report it should be remembered that the figures of employment, value of production, etc., do not refer to individual products but to all the products made in an industry. For example, the value of production of the confectionery industry amounting to \$99,424,355 does not imply that this was the value of confectionery produced. What it means is that the firms whose principal product was confectionery, had a value of production of \$99,424,355. This figure, in addition to confectionery, includes all the subsidiary products made by these firms, such as ice cream which was valued at \$2,415,796, and bread and other bakery products valued at \$1,920,889. Confectionery is also produced as a subsidiary product by firms credited to other industrial classification. For total production figures of individual products reference should be made to "The Alphabetical List of Products" published annually in the printed report on manufacturing.

The incidence of the depression during the thirties resulted in a rearrangement in the ranking of many industries which in some cases proved to be temporary. Under the impetus of war production, the industries engaged in producing the equipment needed by the armed forces, such as ship-building, aircraft, and miscellaneous chemical products, advanced to higher positions. With the end of the war in 1945, the industries engaged in the production of consumers' goods, by reason of the greater demand for their products, bettered their position. As shown by the following table, a return to the pre-war ranking of the leading industries is in evidence. The ten leading industries in 1949 in order of their importance, as measured by the gross value of production, were as follows:

L'industrie manufacturière du Canada est centralisée principalement dans l'Ontario et le Québec. L'Ontario est la première province manufacturière du Canada. En 1949, avec 36 p. 100 seulement de tous les établissements qui font rapport, cette province procure de l'emploi à 48 p. 100 des personnes engagées dans l'industrie manufacturière et donne 49 p. 100 de la production totale. Le Québec, avec 30 p. 100 de la production totale se classe deuxième, et la Colombie-Britannique, avec 8 p. 100, troisième.

Ainsi qu'il a été mentionné ci-dessus, le nombre de personnes employées dans les industries de la fabrication en 1949, y compris Terre-Neuve, s'élève à 1,171,207 dont 221,551 sont classées employés à salaire et propriétaires actifs et 949,656, employés à gages. Au regard de l'année précédente, ce nombre augmente de 15,201, dont 9,935 hommes et 5,266 femmes. Pour parer à la rareté de la main-d'oeuvre durant la guerre, un nombre sans cesse croissant de femmes avaient été absorbées dans l'industrie. La proportion de femmes engagées dans la fabrication est un indice de cette tendance vers l'augmentation. En 1939, chaque millier d'employés comptait 220 femmes; en 1944, ce chiffre s'élève à 287. Lorsque la guerre prit fin, un grand nombre d'ouvrières qui perdirent leur emploi ne furent pas absorbées par d'autres industries. Il en est résulté que la proportion de femmes dans les manufactures est tombée à 240 en 1949. Le gain en 1949 a été de \$2,213 au regard de \$2,085 l'année précédente. Les salaires moyens, à \$2,836, étaient de \$149 plus élevés, tandis que les gages moyens étaient de \$2,068, soit \$109 plus élevés.

En interprétant la statistique de l'industrie contenue dans le présent rapport, il faut se rappeler que les chiffres relatifs à l'emploi, à la valeur de la production, etc. ne s'appliquent pas à chaque produit mais à tous les produits de l'industrie. Ainsi, la valeur de la production de l'industrie de la confiserie, qui s'élève à \$99,424,355, n'est pas celle de la confiserie produite. Elle signifie plutôt que la valeur de la production de cette industrie, dont la confiserie est le principal produit, a atteint \$99,424,355. Ce chiffre, comprend, en plus de la confiserie, tous les autres produits secondaires fabriqués par ces établissements dont la crème glacée (valeur de \$2,415,796), et le pain et autres produits de la boulangerie (valeur de \$1,920,889). La confiserie est aussi le produit secondaire de certains établissements qui figurent dans d'autres catégories d'industries. Pour obtenir les chiffres de la production totale de chaque produit, il faut se référer à la "Liste alphabétique des produits", publiée annuellement dans un rapport imprimé sur l'industrie manufacturière.

La dépression des années 1930 a nécessité un remaniement de l'ordre de plusieurs industries. Dans plusieurs cas, la chose n'avait qu'un caractère provisoire cependant. Sous l'impulsion de la production de guerre, les industries engagées dans la production de l'équipement nécessaire aux forces armées, telles que la construction de navires, l'avionnerie, les produits chimiques divers se sont hissées à des rangs supérieurs. La guerre terminée en 1945, les industries engagées dans la production de biens de consommation ont amélioré leur position, grâce à une demande plus grande. Ainsi que l'indique le tableau suivant, les principales industries reviennent à leur rang d'avant-guerre. Les dix principales industries en 1949, par ordre d'importance établi d'après la valeur brute de la production, sont les suivantes:

Industry	Rank — Rang			Industrie
	1949	1944	1939	
Pulp and paper .....	1	5	2	Pulpe et papier
Slaughtering and meat packing .....	2	1	3	Abattoirs et salaisons
Non-ferrous metal smelting and refining .....	3	2	1	Réduction et affinage des métaux non ferreux
Motor vehicles .....	4	7	5	Véhicules automobiles
Petroleum products .....	5	14	6	Dérivés du pétrole
Sawmills .....	6	11	8	Scieries
Butter and cheese .....	7	10	4	Beurre et fromage
Primary iron and steel .....	8	13	11	Fer et acier primaires
Railway rolling-stock .....	9	16	16	Matériel roulant de chemin de fer
Flour mills .....	10	15	10	Minoterie

## THE MANUFACTURING INDUSTRIES OF CANADA, BY PROVINCES, 1949

TABLE 1. Summary Statistics of the Manufacturing Industries, Canada, 1917-1949

1949 .....	35,792	" "	1,171,207	2,591,890,657	6,843,231,064	5,330,566,434	12,479,593,300

1. A change in the method of computing the number of wage-earners in the years 1925 to 1930 increased the number somewhat over that which the method otherwise used would have given. In 1931, however, the method in force prior to 1925 was re-adopted. The figures for 1931 and later years are, therefore, comparable with those for 1924 and earlier years. — Vu la modification apportée à la méthode de calcul de 1925 à 1930 le nombre d'employés à gages est plus élevé qu'il ne l'aurait été si l'on s'était servi de l'ancienne méthode. En 1931, toutefois, la méthode antérieure à 1925 a été réadoptée. Les chiffres de 1931 et des années suivantes sont donc comparables avec ceux de 1924 et des années précédentes.

2. In accordance with a resolution passed by the Conference of British Commonwealth Statisticians, 1935, the net value of production is now computed by subtracting the cost of fuel and electricity as well as the cost of materials from the gross value of the products. The figures for 1924 and later years have, therefore, been revised in accordance with this resolution. The revision could not be carried farther back as statistics for the cost of electricity are not available for years prior to 1924. — En vertu d'une résolution adoptée à la conférence des Statisticiens du Commonwealth Britannique, en 1935, la valeur nette de production est maintenant calculée en soustrayant le coût des matières premières, plus le combustible et l'électricité, de la valeur brute des produits. Les chiffres de 1924 et des années postérieures ont donc été révisés conformément à cette résolution. Les calculs ne peuvent remonter plus haut que 1924, les statistiques du coût de l'électricité n'existant pas antérieurement à cette date.

TABLE 9. Principal Statistics Compared for 1948 and 1949

TABLEAU 9. Principales statistiques comparées pour 1948 et 1949

Principal Statistics		1948	1949	+Increase -Decrease +Augmentation -Diminution		Principales statistiques
Establishments .....	No.	254	251	- 3	Nomb.	Etablissements
Employees on salaries:						Employés à salaires:
Male .....	No.	360	382	+ 22	Nomb.	Hommes
Female .....	No.	99	101	+ 2	Nomb.	Femmes
Total salaries .....	\$	580,421	685,087	+104,666	\$	Total des salaires
Employees on wages:						Employés à gages:
Male .....	No.	936	894	- 42	Nomb.	Hommes
Female .....	No.	364	370	+ 6	Nomb.	Femmes
Total wages .....	\$	1,493,564	1,448,468	- 45,096	\$	Total des gages
Cost of fuel and electricity .....	\$	221,619	247,736	+ 26,117	\$	Coût du combustible et de l'électricité
Cost of materials .....	\$	12,634,785	13,537,144	+902,359	\$	Coût des matières
Net value of products <sup>1</sup> .....	\$	4,217,680	4,338,320	+120,640	\$	Valeur nette des produits <sup>1</sup>
Gross value of products .....	\$	17,074,084	18,123,200	+ 49,116	\$	Valeur brute des produits

1. Gross value of production less cost of materials and fuel and electricity used. — Valeur brute de la production, moins le coût des matières, du combustible et de l'électricité.

1. Not comparable with previous years. — Non comparable aux années antérieures.

2. Other leading industries statistics for which cannot be given because there are fewer than three establishments in each industry are "Non-ferrous metal smelting and refining" and "Vegetable oil mills". — La réduction et l'affinage des métaux non ferreux et les huiles végétales comptent aussi parmi les principales industries. Les chiffres cependant ne peuvent en être publiés car il y a moins de trois établissements dans chacune de ces industries.

TABLE 37. Principal Statistics Compared for 1948 and 1949

TABLEAU 37. Principales statistiques comparées pour 1948 et 1949

Principal Statistics		1948	1949	+ Increase - Decrease — + Augmentation - Diminution	Principales statistiques	
Establishments .....	No.	1,567	1,685	+ 118	Nomb.	Etablissements
Employees on salaries:						Employés à salaires:
Male .....	No.	3,935	4,287	+ 352	Nomb.	Hommes
Female .....	No.	1,159	1,311	+ 152	Nomb.	Femmes
Total salaries .....	\$	10,809,398	12,937,715	+2,128,317	\$	Total des salaires
Employees on wages:						Employés à gages:
Male .....	No.	17,461	17,727	+ 266	Nomb.	Hommes
Female .....	No.	3,135	3,100	- 35	Nomb.	Femmes
Total wages .....	\$	38,925,938	42,177,839	+3,251,901	\$	Total des gages
Cost of fuel and electricity .....	\$	5,200,147	5,949,765	+ 749,718	\$	Coût du combustible et de l'électricité
Cost of materials .....	\$	253,754,967	251,364,059	- 2,390,908	\$	Coût des matières
Net value of products <sup>1</sup> .....	\$	107,124,387	114,681,296	+7,556,909	\$	Valeur nette des produits <sup>1</sup>
Gross value of products .....	\$	366,079,501	371,995,120	+5,915,619	\$	Valeur brute des produits

1. Gross value of production less cost of materials, fuel and electricity used. — Valeur brute des produits moins le coût des matières, du combustible et de l'électricité.

TABLE 38. Principal Statistics by Groups of Industries, Province of Alberta, 1948 and 1949

Division de l'industrie et du commerce  
Bureau fédéral de la Statistique

## NOTICE

The Industry and Merchandising Division of the Bureau of Statistics collects and compiles figures on (a) the primary industries in Canada—mining, forestry and fishing; (b) manufacturing; (c) construction; and (d) merchandising and services.

For the purpose of annual compilation and publication, the manufacturing industries have been classified into major groups, prefaced by two reports of a general nature, as follows:

- I Summary report on manufacturing industries
- II The manufacturing industries of Canada, by provinces
- III Food and beverages
- IV Tobacco and tobacco products
- V Rubber products
- VI Leather products
- VII Miscellaneous manufactures
- VIII Textiles
- IX Wood and paper products
- X Printing trades
- XI Operations in the woods
- XII Iron and steel products
- XIII Transportation equipment
- XIV Non-ferrous metal products
- XV Electrical apparatus and supplies
- XVI Non-metallic mineral products
- XVII Products of petroleum and coal
- XVIII Chemicals and allied products

The present report belongs in Group II. It is punched to permit filing in a ring binder along with other reports of the group, the full list of which is as follows.

**Section 1.** Principal statistics of major industrial groups and leading industries.

**Section 11.** Principal statistics of the individual industries.

**Section 111.** The manufacturing industries by geographical areas.

## AVIS

La Division de l'industrie et du commerce du Bureau fédéral de la statistique réunit et analyse les chiffres sur (a) les industries primaires du Canada—mines, forêts et pêche; (b) l'industrie manufacturière (c) la construction; et (d) le commerce et les services.

Pour les besoins de l'analyse et de la publication annuelles, les industries manufacturières ont été divisées en grands groupes précédés de deux rapports d'un caractère général:

- I Rapport sommaire sur les industries manufacturières
- II Industries manufacturières du Canada, par provinces
- III Aliments et boissons
- IV Tabac et produits du tabac
- V Produits du caoutchouc
- VI Produits du cuir
- VII Industries manufacturières diverses
- VIII Textiles
- IX Produits du bois et du papier
- X Métiers de l'imprimerie
- XI Opérations en forêt
- XII Produits du fer et de l'acier
- XIII Équipement de transport
- XIV Produits de métaux non ferreux
- XV Appareils et fournitures électriques
- XVI Produits des minéraux non métalliques
- XVII Dérivés du pétrole et du charbon
- XVIII Produits chimiques

Le présent rapport fait partie du groupe II. Il est perforé de façon qu'on puisse l'insérer dans un relieur à anneaux avec les autres rapports du groupe, dont voici la liste complète:

**Section 1.** Principales statistiques des grands groupes d'industries et des industries les plus importantes.

**Section 11.** Principales statistiques de chaque industrie.

**Section 111.** Répartition géographique des industries manufacturières.

## FOREWORD

Two major changes were adopted in the compilation of manufacturing statistics for 1949. First, the compilations contain for the first time statistics for Newfoundland, and second, there was also a change in the system of classifying industries. Under the Standard Classification adopted in 1949, the industries are grouped into seventeen major groups as listed below;

1. Food and beverages
2. Tobacco and tobacco products
3. Rubber products
4. Leather products
5. Textile products (except clothing)
6. Clothing (textile and fur)
7. Wood products
8. Paper products
9. Printing, publishing and allied industries
10. Iron and steel products
11. Transportation equipment
12. Non-ferrous metal products
13. Electrical apparatus and supplies
14. Non-metallic mineral products
15. Products of petroleum and coal
16. Chemicals and allied products
17. Miscellaneous manufacturing industries

The nine groups formerly used, were:

1. Vegetable products
2. Animal products
3. Textiles and textile products
4. Wood and paper products
5. Iron and its products
6. Non-ferrous metal products
7. Non-metallic mineral products
8. Chemicals and allied products
9. Miscellaneous industries

Some industries were broken down such as the electrical apparatus and supplies industry which now comprises five industries (a) batteries (b) heavy electrical machinery, (c) radios and radio parts, (d) refrigerators, vacuum cleaners and appliances and (e) miscellaneous electrical products. In some cases establishments were transferred from one industry to another in order to bring them in line with the new industries which were established. Where an industry was eliminated the establishments were transferred to one or several other industries, depending on the nature of the principal products manufactured. A check was also made of each establishment and many transfers were made where the major products of the establishment had materially changed during the past few years. All these changes make it practically impossible to evaluate industry changes between 1948 and 1949.

## AVANT-PROPOS

Deux changements importants ont été apportés à la méthode de calcul de la statistique manufacturière en 1949. D'abord, et pour la première fois, les calculs tiennent compte des chiffres de Terre-Neuve et ensuite la méthode de classification des industries a été modifiée. D'après la nouvelle classification adoptée en 1949, les industries sont réparties entre dix-sept groupes principaux, comme suit:

1. Aliments et boissons
2. Tabac et produits du tabac
3. Produits du caoutchouc
4. Produits du cuir
5. Textiles (vêtements exceptés)
6. Vêtements (textile et fourrure)
7. Produits du bois
8. Produits du papier
9. Impression, édition et industries connexes
10. Produits du fer et de l'acier
11. Equipement de transport
12. Produits des métaux non ferreux
13. Appareils et fournitures électriques
14. Produits des minéraux non métalliques
15. Dérivés du pétrole et du charbon
16. Produits chimiques
17. Industries manufacturières diverses

Les neuf groupes autrefois employés, sont:

1. Substances végétales
2. Produits animaux
3. Textiles et tissus
4. Bois et papier
5. Fer et ses produits
6. Métaux non ferreux
7. Métalloïdes
8. Produits chimiques
9. Industries diverses

Certaines industries ont été subdivisées; par exemple, l'industrie des appareils et des fournitures électriques comprend maintenant cinq industries: a) accumulateurs, b) machinerie électrique lourde, c) radios et pièces, d) réfrigérateurs, aspirateurs et autres articles électriques, et e) articles électriques divers. Il a fallu, dans certains cas, transporter les établissements d'une industrie à une autre afin qu'ils soient en harmonie avec les industries nouvelles. Là où une industrie a été éliminée, les établissements ont été transportés à une ou plusieurs autres, selon la nature du principal produit fabriqué. Chaque établissement a aussi été vérifié et plusieurs transferts ont été effectués là où les principaux produits de l'établissement ont changé sensiblement au cours des quelques dernières années. En raison de tous ces changements, il est à peu près impossible d'évaluer les transformations qui se sont produites dans l'industrie entre 1948 et 1949.

DOMINION BUREAU OF STATISTICS

Department of Trade and Commerce

THE MANUFACTURING INDUSTRIES  
OF CANADA  
1949

SECTION III  
GEOGRAPHICAL DISTRIBUTION

*Published by*  
Authority of the Rt. Hon. C. D. Howe  
Minister of Trade and Commerce

This report is a part of the annual Census of Industry and Merchandising  
Prepared in the General Manufactures Section  
Dominion Bureau of Statistics  
Ottawa

## NOTICE

The Industry and Merchandising Division of the Bureau of Statistics collects and compiles figures on (a) the primary industries in Canada — mining, forestry and fishing; (b) manufacturing; (c) construction; and (d) merchandising services.

For the purpose of annual compilation and publication, the manufacturing industries have been classified into major groups, prefaced by two reports of a general nature, as follows:

- I Summary Report on Manufacturing Industries
- II The Manufacturing Industries of Canada, by provinces
- III Food and Beverages
- IV Tobacco and Tobacco Products
- V Rubber Products
- VI Leather Products
- VII Miscellaneous Manufactures
- VIII Textiles
- IX Wood and Paper Products
- X Printing Trades
- XI Operations in the Woods
- XII Iron and Steel Products
- XIII Transportation Equipment
- XIV Non-ferrous Metal Products
- XV Electrical Apparatus and Supplies
- XVI Non-metallic Mineral Products
- XVII Products of Petroleum and Coal
- XVIII Chemicals and Allied Products

The present report belongs in Group II. It is punched to permit filing in a ring binder along with other reports of the group, the full list of which is as follows:

**Section I.** Principal statistics of major industrial groups and leading industries.

**Section II.** Principal statistics of the individual industries.

**Section III.** The manufacturing industries by geographical areas.

1. Not reported.

2. A change in the method of computing the number of wage-earners in the years 1925 to 1930, inclusive, increased the number somewhat over that which the method otherwise used would have given. In 1931, however, the method in force prior to 1925 was re-adopted. The figures for 1931 and later years are, therefore, comparable with those for 1924 and earlier years.

3. In accordance with a resolution passed by the Conference of British Commonwealth Statisticians, 1935, the net value of production is now computed by subtracting the cost of fuel and electricity as well as the cost of materials from the gross value of the products. The figures for 1924 and later years, have, therefore, been revised in accordance with this resolution. The revision could not be carried farther back as statistics for the cost of electricity are not available for years prior to 1924.

1. Statistics for Newfoundland do not include fish canning and curing industry.

2. Net value is derived from gross value, by deducting cost of materials, fuel and electricity. (Footnote 3, Table 1).

3. No urban

4. Separate totals for urban and rural may not be published.

<i>Percentage of industries of twenty-five leading cities to totals of all industries in Canada. ....</i>	<i>37.3</i>	<i>56.1</i>	<i>58.9</i>	<i>46.1</i>	<i>57.9</i>	<i>57.6</i>

1. Note: Statistics cannot be published for Corner Brook East, Newfoundland; Arvida, Gatineau, Magog, Noranda, Quebec; Coniston, Copper Cliff, Kapuskasing and Port Colborne, Ontario.

2. Net Value is derived from gross value by deducting cost of materials, fuel and electricity (see Footnote 3, Table 1).

**TABLE 16. Statistics of Manufactures of Municipalities, with Three or More Establishments, 1949**

Note. Statistics for cities and towns with three or more establishments cannot be published when one establishment has 75 p.c. or two establishments 90 p.c. of the total production

1. Includes: Animal oils and fats, 1; biscuits and crackers, 1; confectionery, 2; feed and chopping mills, 2; flour mills, 2; fruit and vegetable preparations, 1; malt liquors, 2; prepared breakfast foods, 1; processed cheese, 1; sausage and sausage casings, 1.

2. Includes: Gloves and mittens, leather, 1; miscellaneous leather products, 2.

3. Includes: Hats and caps, 3; knitted goods, 1.

4. Includes: Excelsior, 1; sawmills, 2.

5. Includes: Agricultural implements, 2; hardware, tools and cutlery, 1; iron castings, 3; wire and wire goods, 1.

6. Includes: Miscellaneous non-metallic mineral products, 1; stone products, 1; stoneware and pottery from domestic clay, 1.

7. Includes: Medicinal and pharmaceutical preparations, 1; miscellaneous chemicals and allied products, 2; paints and varnishes, 1; soaps, washing and cleaning compounds, 2.

8. Includes: Scientific and professional instruments and equipment, 1; signs, neon and other, 2; stamps and stencils, rubber and metal, 1; toys and games, 1.

9. Includes:

(1) Rubber Products, 1.

(2) Paper Products — Boxes and bags, paper, 1.

(3) Transportation Equipment — aircraft and aircraft parts, 1; automobile supplies, 1; bicycles and parts, 1; boatbuilding, 1; railroad and rolling stock equipment, 2.

(4) Electrical Apparatus and Supplies — miscellaneous electrical products, 1.

(5) Products of Petroleum and Coal, 1.

1. Includes: Butter and cheese factories, 2; macaroni and spaghetti, 1; malt liquors, 1; other dairy products, 1; sausage and sausage casings, 1; stock and poultry feeds, 1.

2. Includes: Belting, leather, 2; miscellaneous leather products, 3.

3. Includes: Bags, cotton and jute, 2; carpets, mats and rugs, 1; cordage, rope and twine, 1; cotton thread, 1; dyeing and finishing of textiles, 1; embroidery, 1; miscellaneous textiles, 1; miscellaneous wollen goods, 2; woollen yarn, 1.

4. Includes: Clothing, women's factory, 1; corsets, 1; hats and caps, 2.

5. Includes: Boxes and baskets, wood, 2; coffins and caskets, 2; cooperage, 1; hardwood flooring, 1; sawmills, 1; woodturning, 1.

6. Including roofing paper, 2.

7. Includes: Lithographing, 2; printing and publishing, 1; trade composition, 2;

8. Includes: Agricultural implements, 1; boilers, tanks and platework, 2; fabricated and structural steel, 1; heating and cooking apparatus, 2; machine tools, 2.

9. Includes: Automobiles, 1; automobile parts, 3; boatbuilding, 1; railroad and rolling stock equipment, 3.

10. Includes: Aluminum products, 4; white metal alloys, 2.

11. Includes: Asbestos products, 2; glass products, 5; miscellaneous non-metallic mineral products, 3.

12. Includes: Acids, alkalies and salts, 1; coal tar distillation, 1; fertilizers, 1; gases, compressed, 2; medicinal and pharmaceutical preparations, 2; paints and varnishes, 2; soaps, washing and cleaning compounds, 7; vegetable oil mills, 1.

13. Includes: Ice, manufactured, 2; miscellaneous industries, 1; scientific and professional instruments and equipment, 2; stamps and stencils, rubber and metal, 2; statuary, art goods, and novelties, 1.

14. Includes: Tobacco and tobacco products, 1 and rubber products, 3.

**TABLE 17. Principal Statistics of the Industries Located in Selected Cities, 1949 — Continued**  
**KITCHENER — concluded**

1. Includes: Biscuits and crackers, 1; butter and cheese, 2; carbonated beverages, 2; confectionery, 1; flour and feed mills, 1; malt liquors, 1; miscellaneous foods, 2; prepared stock and poultry feeds, 2; sausage and sausage casings, 2.
2. Also, boot and shoe findings, leather, 2.
3. Includes: Canvas products, 1; cordage, rope and twine, 1; cotton yarn and cloth, 2; dyeing and finishing of textiles, 1; embroidery, 1; laces, tapes and bindings, 1; miscellaneous textiles, 1.
4. Includes: Clothing contractors, men's, 1; fur goods, 1; miscellaneous clothing, 1.
5. Includes: Engraving, electrotyping and stereotyping, 1; printing and bookbinding, 16; printing and publishing, 1; publishing (only); 11; trade composition, 1.
6. Includes: Iron castings, 2; sheet metal products, 1; wire and wire goods, 2.
7. Includes: Aluminum products, 1; brass and copper products, 2.
8. Includes: Brick and tile, 1; clay products from imported clays, 1; glass products, 2; stone products, 2.
9. Includes: Adhesives, 1; medicinal and pharmaceutical supplies, 2; plastics, primary, 1; cleaning preparations, 1.
10. Includes: Brooms, brushes and mops, 1; ice, manufactured, 1; lamps, electric and lamp shades, 1; scientific and professional instruments and equipment, 2; sporting goods, 1; stamps and stencils, rubber and metal, 1.
11. Includes: Paper products — boxes and bags, paper, 2; transportation equipment — automobile supplies, 3; miscellaneous transportation equipment, 1; products of petroleum and coal — coal and gas products, 1.

1. Includes: Biscuits and crackers, 2; butter and cheese, 2; confectionery, 3; flour mills, 1; fruit and vegetable preparations, 1; malt liquors, 1; other dairy products, 1; prepared breakfast foods, 1; processed cheese, 1; slaughtering and meatpacking, 2.

2. Includes: Boots and shoes, leather, 4; miscellaneous leather products, 3; leather tanneries, 1.

3. Includes: Clothing, men's factory, 1; clothing, women's factory, 1; hats and caps, 2; knitted goods, 2.

4. Includes: Boxes and baskets, wood, 1; coffins and caskets, 1; cooperage, 1; sawmills, 1; woodturning, 1.

5. Also roofing paper 1.

6. Includes: Engraving, stereotyping and electrotyping, 2; trade composition, 2.

7. Includes: Iron and Steel Products — Agricultural implements, 2; boilers, tanks and plate work, 2; fabricated and structural steel, 1; heating and cooking apparatus, 2; hardware, tools and cutlery, 2; iron castings, 2; wire and wire goods, 1.

Transportation Equipment — Boatbuilding, 1; railroad and rolling stock equipment, 1.

8. Includes: Aluminum products, 1; brass and copper products, 2; jewellery and silverware, 1; white metal alloys, 1.

9. Includes: Miscellaneous electrical products, 3; radios and radio parts, 1; refrigerators, vacuum cleaners and appliances, 2.

10. Includes: Glass products, 2; stone products, 2.

11. Includes: Cleaning preparations, 2; fertilizers, 1; gases, compressed, 1; inks, printing, 1; paints and varnishes, 2; soaps, 1; toilet preparations, 2; washing compounds, 1;

12. Includes: Ice, manufactured, 1; musical instruments, 1; scientific and professional instruments and equipment, 1; signs, neon and other, 1; stamps and stencils, rubber and metal, 1.

1. Includes: Biscuits and crackers, 2; fruit and vegetable preparations, 3; malt liquors, 2; other dairy products, 1; sausage and sausage casings, 1.

2. Includes: Canvas products, 6; woollen cloth, 1.

3. Includes: Children's clothing, 2; clothing, women's factory, 1; fur dressing and dyeing, 1; hosiery, 2; knitted goods, 1; oiled and water-proofed clothing, 1.

4. Includes: Coffins and caskets, 1; lasts, trees and other wooden shoe findings, 1; plywood and veneer, 1; woodturning, 1; woodenware, 2.

5. Includes: Boilers, tanks and platework, 1; fabricated and structural steel, 1; hardware, tools and cutlery, 1; heating and cooking apparatus, 2; machinery, 1; primary iron and steel, 1; sheet metal products, 2; wire and wire goods, 1.

6. Includes: Brass and copper products, 1; jewellery and silverware, 2.

7. Includes also Brick and tile head office.

8. Includes: Fertilizers, 1; gases, compressed, 1; soaps, 2.

9. Includes: Artificial flowers and feathers, 1; ice, manufactured, 1; signs, neon, and other, 1; sporting goods, 1; stamps and stencils, rubber and metal, 1; statuary, art goods and novelties, 2; toys and games, 1.

10. Includes: (1) Rubber Products, 1.

(2) Paper Products — Boxes and bags, paper, 4; miscellaneous paper products, 1; pulp and paper mills, 2.

(3) Transportation Equipment — Automobile supplies, 1; shipbuilding and repairs, 1.

(4) Electrical Apparatus and Supplies — Miscellaneous electrical products, 1; radios and radio parts, 1.

(5) Products of Petroleum and Coal — Coke and gas products, 1.
